

## Approved ISSM Updates – July 2023

The Information Systems Standards Committee (ISSC) approved the following new standards. These updated standards have been incorporated into the current Information Systems Standards Manual (ISSM).

### Technical Standards – Applications, sec 1.5.1 Java

Added information on storing code in enterprise GitHub. Added section on SonarQube. Removed information that was guidelines or optional to a best practices page in GitHub.

### Security Management Volume, sec 2.1.6 Admin Periodic Review

Updated Technology System Administrator Definitions table to include Azure AD and updated the TACACS section.

### Security Management Volume, sec 1.1.4 Awareness and Training

Updated to match current security awareness and compliance training practices and removed obsolete content.

The following Table of Cosmetic and Wording changes was presented and had only 1 read before being incorporated into the ISSM.

### Security Management and Technical Standards – Applications Volumes

Cosmetic and Wording Changes.
